Preparing for your Patient Service Center (PSC) visit, lab results and billing:

- Although appointments are not mandatory, they are prioritized over walk-in visits. You can make an appointment by visiting www.dlolab.com/locations and clicking the "Make an Appointment" button for the patient service center you plan to visit. Please keep in mind that most patient service centers tend to be busiest early in the morning.
- Test results will be sent directly to your physician and made available through MyQuest™, Quest Diagnostic's online patient portal provided by DLO. To learn more about MyQuest™ or to create an account, visit www.dlolab.com/myquest. If you would like a copy of your results sent directly to you, please call DLO Customer Service at 1-800-891-2917 (option 2) and request a Request For Access form. You can also reach out to your healthcare provider for results.
- Most test results are reported to your ordering healthcare provider and MyQuest™ within 24 hours, although some tests may take several days to weeks.
- Test costs can vary based on factors such as insurance coverage, age, and your healthcare provider's agreement with DLO. For any billing questions, please contact DLO's Billing Department at 1-800-891-2917 (option 6).
- DLO processes all insurance claims with contracted payers designated as "in-network." Claims filed with other insurance plans may be classified as out-of-network, which can result in a bill for the patient. For a complete list of preferred and in-network insurance plans accepted by DLO, please visit www.dlolab.com/insurance.

Preparing for your lab services:

A blood test is a straightforward procedure that may require fasting or avoiding certain medications depending on the test. A urinalysis is another common diagnostic test that usually requires no special preparation. It's essential to check with your healthcare provider for specific instructions.

- For blood tests, confirm any dietary/medication restrictions prior to visiting a Patient Service Center or Draw site. At the PSC or draw site, a healthcare professional will collect blood from your arm (a short sting will be felt), and apply pressure to the site after the test. The blood specimen will be sent to a lab, and examined using special laboratory instruments. The laboratory sends the test results to MyQuest™ and your healthcare provider so they can explain the test results to you.
- For urinalysis, your healthcare professional will provide you with a sterile container required to collect urine. The container will then be labeled and sent to the lab where it will be examined. Lab results will be sent to your healthcare provider and MyQuest™.
