500 N. Clarence Nash Blvd.
M-F: 8 AM-5 PM

DLO Contracted Draw Sites only accept paper requisitions from healthcare providers only and cannot perform DLO Direct testing.

Order Your Own Lab Tests • No Insurance or Doctor's Order Needed

DLO believes consumers should have the most accurate and up-to-date information needed to proactively manage their personal health. That's why DLO is proud to offer DLO Direct™, a program that gives our customers the ability to order select lab tests without a healthcare provider. **DLO Direct™ testing can only be performed at DLO's Patient Service Centers** which are listed on the other side of this sheet. For more information on available self-ordered lab testing, please visit dlodirect.com.

Preparing for your Patient Service Center (PSC) visit, lab results and billing:

- While appointments aren't required, you do have the ability to make an appointment by visiting dlolab.com/locations and click the "Make an Appointment" link on the lab you plan to use. Keep in mind, DLO PSCs are busiest early in the morning.
- Test results will be delivered directly to your physician and through MyQuest™, DLO's online patient portal. To learn more about MyQuest and to create an account, visit dlolab.com/myquest. If you wish to have a copy sent directly to you, call DLO Client Services at 800-891-2917 option #2 and ask for a Request for Access Form or contact your healthcare provider.
- Most test results are reported to your ordering healthcare provider and MyQuest within 24 hours, although certain tests can take several days to weeks.
- Test costs vary by several factors including insurance coverage, age and your health care's agreement with DLO. For billing questions, contact us at 800-891-2917.
- DLO files all insurance claims to the contracted payers "in-network". Other insurance plans may be considered as out-of-network, resulting in a patient bill. Visit dlolab.com/insurance for a complete list of preferred and in-network health plans accepted by DLO. For any questions, contact us at 800-891-2917.

What happens when you get your blood tested:

A blood test is a very simple procedure. Usually you do not need to prepare for your blood test. However, for some tests, you might need to stop eating or drinking beforehand. You might also need to stop taking medication. Be sure to contact your healthcare provider about requirements for your specific test. Here are the steps in a blood test:

- You are pricked with a small needle, usually on your arm.
- Some of your blood goes into a specimen tube.
- The laboratory examines your blood using special instruments.
- The laboratory sends the test results to your healthcare provider so they can explain the test results to you.
